FIRM IN SPITE OF A PANIC

Better Tone and Some Advances Made in All of the Chicago Markets.

September Wheat, of Which There Is Much Speculative Buying, Gained 1 Cent, as Did Corn, Which Is Very Strong Just Now.

TRADING AT CHICAGO.

Hog Products Stightly Higher on Good Buying Orders from the Country.

CHICAGO, May 5. - Notwithstanding the panicky condition of the New York stock market everything on 'Change here had good support. This state of affairs was partly due to bad weather for the crops, both at nome and abroad. Wheat started 4 @ se higher and closed about se higher for July and le for September. There was pretty good buying, and some of the principals who were connected with the May deal were reported as buyers for July and September deliveries. While financial news from New York was unfavorable, operators did not seem disposed to sell much wheat on the strength of it, and the offerings were of a moderate character. Cables were higher and the crop advices in the country continue unfavorable, creating a somewhat builish sentiment. There were heavy cold rains in the Dakotas, and dry weather in Kansas, while the weather in Europe was reported as none too favorable. The lot of 1,000,000 bushels which the Cudabys took from the crowd in the first few minutes was also a strong lever to assist prices upwards. The market started for July at 75 %c, touched 75 4c and 74 %c on the early trades, and advanced straight to 75%c. There was a dip to 7542c before midday and a second rally to 75%c later. September sold at 77 sc and 77 sc.

In corn another active day was witnessed, with a good general trade, though prices kept within le range. Everything considered, the corn market was the strongest on the floor. It is safe to say that have been double that but for the panie in Wall street, which made everybody cautious. The receipts were light at 183 cars. and withdrawals were liberal at nearly 200,000 bushels. The weather over the corn belt was not favorable for plowing or seeding. Cold rains prevailed to prevent seasonable growth where the seed is in the ground. As a result of all this, and becash corn was strong and higher. The best prices of the day were made near the close. July rose to 411/2c, and September to 46 c. Closing prices were at the highest point of the day, July 45 to and September

Another active session was experienced by traders in oats, that market ruling stronger with the other cereals and closing at from 1/2 to 10 higher.

Hog products were slightly higher early, on improved prices, and active buying of live hogs at the yards, and some covering by those who sold short yesterday. The offerings were a little in excess of the wants of the crowd, however, and the mar-ket eased off some, only to become firmer rye, 1,000 bu. Shipments—Flour, 5,000 brls; again on good buying orders. For pork the opening sales were 5c higher, the market improving 1716c on orders to buy. and strong grain markets and then declining to the opening price of the day and closing steady. Changes were made from May to September at 75e premium for the latter. Lard was rather dull. The market opened .050 better and improved .074c; then declined .10c, but reacted and closed .05c above vesterday. Ribs were quiet but strong. The opening was .10c higher, declined .05c, advanced .124c, fell off .05, and closed steady.

Estimated receipts for to-morrow are: Wheat, 235 cars; corn, 145 cars; oats, 160 cars; hogs, 9,000. The leading futures ranged

THE FLOUR OUTPUT.

Decrease of 45,000 Barrels at the Minneapolis Mills the Past Week. MINNEAPOLIS, Minn., May 5 .- The Northwestern Miller says: The idleness of some of the big mills last week caused a decrease in the flour output of 45,000 barrels, 134,615 barrels being ground, or an average of 22,436 barrels daily, against 179,-124 barrels the week before, 178,450 barrels for the corresponding time in 1892 and 125,-190 barrels in 1891. This is the smallest amount of flour made in any week since the last in December. Three mills, capable of grinding 8,500 barrels, which were idle last week, have been placed in operation again, while two others have been shut down, cutting off 4,000 barrels. From this it would appear that the output this week will be somewhat larger than that of last week. Flour continues to sell pretty slowly and business on the whole is not very satisfactory. Exporters buy rather more freely than the domestic trade. The linited Kingdom takes both patent and bakers', while Holland contines its purchases to the latter grade and has lately bought quite liberally. Some firms that are able to sell a great deal for export do comparatively nothing at home. Low grades are hard to dispose of, it being reported that other sections are underselling Minneapolis in New York. The direct export shipments by the mills last week were 1,435 barrels, against 43,957 barrels the preceding week. London quotations per 280 pounds c. i. f. are: Patents, 24@25s; bakers', 16@17s; low grades (nominal), 11@12s.

5@712c per pound. SUMMER RESORT AD. KILLED.

The Famons New England Sea "Sarpint' Slaughtered by Fishermen Off Point Weir. PROVINCETOWN, Mass., May 5 .- The coast summer resorts have lost one of their great-

est drawing cards. The famous "sarpint" that annually popped its head out of the water just about the time the hotels opened for the summer is dead. But. though the hotel men may grieve, the Joneses and Jags who are wont to linger too long over their New England buttermilk will be glad. They will no longer be troubled with the fear of seeing the reptile either while returning from a night's jollity or in their dreams. All this depends on the veracity of the men who go down to the sea after fishes off Point Weir. According to the fishermen's story they went to their traps yesterday morning as usual to remove the night's catch of fish, and were considerably surprised to find that the weir was filled with a huge sea monster at that moment lying quietly on the top. Neither end of the creature was visible. but after waiting a few minutes an ugly. vicious-looking bead appeared. The fishermen resolved on the capture of the monster alive, if possible. A running bowline was made and deftly cast, the noose falling over the head and around the creature's neck. Then began a fierce struggle for the mastery, the men trying

to haul the monster out of the trap, and

the creature trying to pull the boat and crew into it. Finally they shot a bomb lance from the whale gun into the creature's neck just back of the head. The lance exploded and broke the backbone, and instantly killed the fish. It was then towed to the beach, and when the tide ebbed scores of people went to see it. The creature is shaped like a huge eel, 18 twenty-nine feet eight inches in length. and four feet six and three-quarter mehes around the body at the largest point, which is just back of the head. The head is convex on the top, the mouth is large and furnished with five rows of saw-like teeth, two rows in the upper jaw which fit snugly between the three rows in the lower. Along the back a serrated fin extend the entire length from head to tail. The latter is shaped like a shark's, with the upper lobe considerably longer than the lower. There are two pectoral and two anal fins, each trifle over three feet. Its color on the back is a dark, muddy green, gradually changing to a light color down the sides, while the belly is almost white. The fish is entirely devoid of scales, and possesses a very tough skin, nearly a quarter of an inch thick. Measures will be taken to preserve the head and jaws entire, but the rest of the body will be skinned, as it would be impossible to preserve such a quantity of flesh. As soon as the fish can be properly cured and mounted it will be sent to Chicago and placed in the Fisheries

DUN & CO.'S WEEKLY REVIEW

Business Finds Little or No Encouragement from the Present Situation.

Imports the Past Month Exceed Exports by About \$10,000,000, and a General Financial Crisis Seems to Be Approaching.

NEW YORK, May 5.-R. G. Dun & Co.'s weekly review says: Had business in Wall street been unsound or unbealthy the collapse of prices during the past week might have cansed a panic. Nearly all stocks fell, but the industrials were most seriously depressed, and while the average decline in all stocks was about \$6 per share for the week, Cordage fell 43 points, Sugar 40 and Manhattan 26. Several failures occurred without general disturbance, and the appointment of receivers for the cordage company was in some sense a relief. Other speculative markets are on the whole rather stronger than a week ago. At nearly all points the backward season and bad weather, with slow collections, cause complaint. At Pittsburg the iron trade is still more depressed, but business in glass is fairly good. Trade at Cincinnati is quiet, but collections are very slow with money in active demand. At Cleveland business is fair to quiet, and at Detroit the backward season causes a shrinkage of 10 to 15 per cent, in orders. At Fort Wayne slow collections are reported, and at Indianapolis money is close. Chicago reports shrinking trade, slow collections, money comparatively tight, a decrease of 15 per cent. in eastward shipments, but increase in real estate and building. Trade improves at Mippeapolis and at St. Paul trade is dull and collections slow. At St. Louis business is active and collections heavy. Grain receipts are large and the river expert trade unusually heavy. Money is in healthy demand and country advices are good. At most Southern points trade is improving though at Louisville money is close. The iron trade shows no improvement There is pressure to sell from the West. Southern No. 2 18 soid at \$8.50. Birming-

ham and Bessemer have fallen to \$13,40 at Pittsburg. Bar is cut again, and structural iron is slow. Sales of 15,000,000 pounds lake copper to American consumers at 11 cents are reported. Coal is dutl. The boot and shoe trade has rarely seen such dulless. Receipts of cattle at the West are slightly larger than a year ago. Wool sales at Boston, Philadelphia and New York for the year are 2,500,000 pounds less than last year to date. Trade in woolens is narrow and disappointing, and in cottons waiting and uncertain. Speculative markets have been rather strong. Wheat has advanced le, corn 1 sc and pork 75e per brl, with scarcely any discernable reason, though Western reports regarding the coming crops are unsatisfactory. Oil dropped nearly 9c per brl, but cotton is unchanged, though the sales here have been heavy. Exports from New York were very small last week, and for the past four weeks have been about \$1,000,000 below last year's, so that imports for the past month were probably \$10,000,000 or more greater than exports. Among the failures of the week only one is reported above \$200,000, one between \$125,000 and \$200,000, two between \$40,000 and \$75,000 and eight between \$20,000 and \$40,000-in all only fifteen exceeding \$10,000, out of 240 in all
